

Press release No.: 11923 - en // BTG Excellence - Duroblade // 25 January 2022

Over 100 years of Excellence at BTG – High Performance blades

BTG has been very successful in providing integrated, highly specialized solutions for the global pulp and paper industry. These solutions are based on BTG's expertise and the leading products that have been introduced over the last century.

As part of BTG's 100 year anniversary, the company is offering a series of 1-page focused flyers, sharing some insight on the products that have helped make BTG successful – and that are still delivering tremendous benefits to clients.

The focus of this issue is on high performing blades. Almost 40 years ago, BTG invented a revolutionary technology for the coated board and paper industry: Duroblade®. This breakthrough innovation allowed for the manufacture of blades with an outstanding lifetime compared to traditional steel blades. This innovation increased machine efficiency tremendously and also improved surface properties that allowed for further cost reduction. Learn more about the high performing blade principle and benefits in this [dedicated document](#).

A flyer on the challenges of consistency measurement and about the [BTG MEK](#) is also available.

BTG Group is a multinational provider of integrated, highly specialized process solutions for the global pulp and paper industry. BTG is committed to help its customers achieve significant, sustainable gains in business performance.
